### ***Election/Restrictions***

The inventions are distinct, each from the other because of the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 5, and 17 – 21, drawn to communication system, classified in class 375, subclass 219.
- II. Claims 6 – 16, drawn to Logic circuit, classified in class 327, subclass 365.

Claims 1 – 5 and 17 – 21 are strictly directed to a data communication system including a bidirectional bridge circuit wherein the bidirectional circuit comprises an output differential amplifier coupled to receive data signals to generate an output logic signal. But, claims 6 – 16 are strictly directed to logic gate and a logic circuit wherein at least one logic gate includes a diode connected metal oxide semiconductor field effect transistor. Data communication system including a bidirectional circuit and a logic circuit are two distinct inventions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
